The undergraduate minor in public health is for any undergraduate student at the University of Minnesota who wishes to complement their major degree program. The minor includes coursework from the School of Public Health and the College of Liberal Arts and is administered in the College of Liberal Arts. The public health minor is designed to give students a foundational understanding of the language, concepts, and methodology used in public health when addressing population health challenges. The minor can be a foundation for further study in public health, other health professions, or any fields in which the health of persons and populations is a relevant concern. In addition, public health courses provide a contribution to a comprehensive liberal arts education.

For more information or to declare go to: http://publichealthminor.umn.edu/ or contact: pubhadv@umn.edu
